

PROFESSIONAL
SUMMARY

4 years of experience as a Full Stack Developer building web-based applications in E-Commerce and Retail platforms. Skilled in developing stable and responsive applications using React, Next.js, Node.js, and MongoDB, with strong knowledge of JavaScript, HTML5, and CSS3. Experienced with React Redux, hooks, and reusable components, including state management, asynchronous operations (Redux Thunk), and API integrations with REST and GraphQL (Apollo). Hands-on with NoSQL data modeling, SQL, and Python, as well as front-end optimization using Bootstrap. Strong understanding of Agile methodology with Jira, Git version control, and proven ability to collaborate in teams or work independently with fast learning.

SKILLS

Python	R	C++
SQL	HTML5	CSS3
JavaScript	React	Redux
MongoDB	JSON	Bootstrap
VSCode	GIT	Jira
Figma	GraphQL	Zustand

EXPERIENCE

Front-end developer

Paypal, San Jose, Mar 2024 - Current

- Worked on the Messaging Team to enhance the PayPal Assistant chat bot and improve overall customer support systems on the company website.
- Improved the UI and user experience of the Messaging SDK, delivering a more intuitive and responsive chat interface.
- Developed and maintained new features, integrating them seamlessly into the PayPal Assistant platform.
- Wrote and optimized unit tests to ensure component reliability and achieved strong coverage.
- Designed and executed functional end-to-end tests using Playwright, ensuring consistent performance across environments.
- Monitored product data and debugging logs to detect, analyze, and resolve production issues.
- Collaborated with cross-functional teams to test features in staging and production environments, ensuring smooth deployments and rollbacks.
- Fixed critical bugs and optimized performance using TypeScript, React, and Node.js.
- Leveraged Chrome Console and Lighthouse to analyze performance and accessibility, driving improvements to the chatbot's speed and reliability.
- Participated in Agile Scrum ceremonies and collaborated with UI/UX designers to refine and deliver high-quality solutions.

Software Engineer

Walmart Global Tech, Sunnyvale, CA, Oct 2023 - Feb 2024

- Company Overview: (C2C from Chuwa)
- Involved in the Emerging Tech team on a project to build an innovative online shopping application designed for social sharing with friends, incorporating AI capabilities.
- Involved in the development of an MVP Next.js web platform application using SCSS modules and Tachyons CSS for styling, used React TypeScript and Zustand for state management, ensuring a modular and maintainable approach to front-end development with Node GraphQL for back-end development.
- Implemented queries and mutations in the front end to interact seamlessly with the GraphQL server and database, enhancing the application's functionality.
- Refactor and transforming components into container/presentational patterns to separate the view UI from application logic, resulting in improved performance and maintainability.
- Created new components based on the new UI/UX design for the upcoming version of the application, contributing to the evolution of the user interface and overall user satisfaction.
- Debugged async querying and front-end rendering issues, ensuring smooth and efficient data retrieval.
- Experienced the end-to-end process of deploying and rolling back applications in a production environment, ensuring smooth and reliable software releases.
- Utilized Splunk to scan for events in the application, enhancing analytic capabilities for effective monitoring and troubleshooting.
- Implemented GraphQL Schema to efficiently handle complex data requirements and optimize front-end interactions.
- Maintained existed query and mutation to optimize and improve performance for our Node back-end API server.
- Discussed with team to brainstorming the plan for incorporating AI capabilities into Node Sever with filter feature.
- Successfully resolved a potential analytic issue caused by conditional re-rendering in the front end, ensuring accurate and reliable data for monitoring and analytic.
- Improved unit test coverage to achieve above 90% branch and lines coverage for components, ensuring robust and reliable code quality and delivering a more stable user experience.
- Collaborated with cross-functional teams, using Jira to create epic and story tickets, to deliver high-quality software solutions in a dynamic and fast-paced environment.
- Developed using Visual Studio Code and GIT to enhance the development work flow.
- (C2C from Chuwa)

Full Stack Developer

Paypal, Sunnyvale, CA, Jun 2022 - Oct 2022

- Company Overview: (C2C from Chuwa)
- Involved in the Users and Permissions Platform identity team to build and maintaining server-side requests based on the different high priority projects.

- Utilize JavaScript, Node.JS, React and GraphQL queries to resolve different API requests.
- Used WebStorm as main development environment to maintaining our code-base and making code changes based on requirement.
- Developed and maintained content modules, templates, and plugins for seamless integration within the CMS environment.
- Involved into code review for Github pull requests for code changes.
- Used Jupyter and SQL query to retrieve production account information to help clarify bug issue.
- Troubleshoot and debug GraphQL API issues for our user identity for different clients.
- Experienced with both React and GraphQL implementation process in production.
- Experienced with add new property to GraphQL schema, update query and mutation.
- Hands on experience use GraphQL queries and mutation to retrieve user identity and updated the info base on different business logic.
- Experienced with different user Auth includes user account, username with password identify and security content used GraphQL Api.
- Involved in unit testing and functional testing for all the developed code included both React component and back-end testing.
- Monitor GraphQL API performance and optimize as needed.
- Collaborated with other team for bug fixing, user data monitoring, and use Postman for testing request.
- Participate in meetings with clients to discuss new features, and business logic.
- Used JIRA platform to tracking our epic, story and bug issue.
- (C2C from Chuwa)

EDUCATION

Bachelor of Science: Mathematics & Computer Science
University of California San Diego, San Diego, CA

Master of Science (M.S.): Computer Systems And Engineering
California Science And Technology University, Milpitas, CA
